

## Questionnaire for Offers of Strength Testing Machines

Please mark where applicable

**Testing Procedure**

- |                            |                              |
|----------------------------|------------------------------|
| Tensile test               | Tear test                    |
| Pressure test              | Separation test              |
| 3-point bending            | Freely programmable          |
| 4-point bending            | Module determination         |
| Technological bending test | Yield strength determination |
| Creep behaviour testing    | Component testing            |
| Cyclical loading           |                              |
| Hysteresis test            |                              |

Please enter the desired values

|           |                      |     |                         |         |
|-----------|----------------------|-----|-------------------------|---------|
|           | <b>Testing Force</b> |     | <b>Testing Velocity</b> |         |
| $F_{max}$ | N                    | Min |                         | mm/min. |
| $F_{min}$ | N                    | Max |                         | mm/min. |

| Specimen Material | Test Standard | Dimensions of the Specimens (min-max) |
|-------------------|---------------|---------------------------------------|
|                   |               |                                       |
|                   |               |                                       |
|                   |               |                                       |

Please mark where applicable

**Type of Clamping**

- |                     |                        |
|---------------------|------------------------|
| Mechanical clamping | <b>Extensometer</b>    |
| Pneumatic clamping  | Mechanical - Clip on   |
| Hydraulic clamping  | Mechanical with stand  |
|                     | Optical - contact-free |

|               |  |
